MATERIALS SCIENCE AND ENGINEERING A VOL. A127 NO. 1 JULY 1990

CONTENTS

Anisotropic residual stress relaxation in cemented carbide composites 1
K. Seol and A. D. Krawitz (Columbia, MO, U.S.A.)

Effect of heat treatment on mechanical properties and fracture behaviour of a 12CrMoV steel. 7
S. A. Bashu, K. Singh and M. S. Rawat (Hyderabad, India)

Tensile and microstructural behavior of solute-modified manganese-stabilized austenitic steels 17
R. L. Klueh and P. J. Maziasz (Oak Ridge, TN, U.S.A.)

Microbands in rolling-deformed nickel single crystals 33
E. E. Zasimchuk and L. I. Markashova (Kiev, U.S.S.R.)

Numerical analysis of creep crack growth in precavitated polycrystalline copper 41
Y.-S. Kim and W. D. Nix (Stanford, CA, U.S.A.)

Secondary hardening embrittlement in W–Ni steels 51
K.-H. Kim and H. Kwon (Seoul, Korea)

Plastic incompatibility and its accommodation by diffusional flow: modelling of steady state creep of a metal matrix composite 57
K. Wakashima, B. H. Choi and T. Mori (Yokohama, Japan)

Dislocation structure of refractory metal single crystals after high-temperature creep—X-ray diffraction study 65
K. P. Ryaboshapka, N. A. Stelmashenko and O. N. Grigor'ev (Kiev, U.S.S.R.)

Analysis of broadened X-ray diffraction profiles: application to the characterization of carbon steels 71
N. Ji, J. L. Lebrun and J. M. Sprauel (Paris, France)

Stabilization of precipitated austenite in tempered Fe–Mn–C steels. 79
M. Grujicic (Clemson, SC, U.S.A.)

Contribution of the R transformation to the two-way memory effect in TiNi alloys 85
C.-M. Mo, G. Lin, J. Li and L. Zhang (Hefei, China)

Microstructure of TiB_2–NiAl 91
L. Wang and R. J. Arsenault (College Park, MD, U.S.A.)

Pressure sintering and transformation toughening of zinc sulfide 99
S. Block, G. J. Piermarini, V. Bean and A. Raynes (Gaithersburg, MD, U.S.A.)

Damage process of ceramics in contact with metals 105
Z. P. Wang and C. Ruiz (Oxford, U.K.)

Oxidation behaviour of electroconductive Si_3N_4–TiN composites 115
A. Bellosi, A. Tampieri and Y.-Z. Liu (Faenza, Italy)

Microstructure–property relations of alumina–zirconia eutectic ceramics. 123
J. Homeny and J. J. Nick (Urbana, IL, U.S.A.)

BOOK REVIEWS 135

LETTERS

Effects of grain boundary carbide on the stress–strain curves of type 316 stainless steel. L1
S. S. Wu, S. Y. Chen and D. Gan (Kaohsiung, Taiwan)

Influence of carbon on creep crack growth of a cast HP alloy L7
S. J. Zhu (Shenyang, China), Y. Wang, S. G. Xu and F. G. Wang (Dalian, China)

The calculation of phase compositions of hypereutectoid low alloy steel at temperatures within and around the eutectoid zone L11
A. Kroupa, L. Karmazin and M. Svoboda (Brno, Czechoslovakia)

Relation between rupture time and steady state rate integral L15
V. M. Radhakrishnan and M. Kamaraj (Madras, India)

Internally slipped martensite in TiNi alloys L19
P. Filip and K. Mazanec (Ostrava, Czechoslovakia)

MATERIALS SCIENCE AND ENGINEERING A VOL. A127 NO. 2 AUGUST 1, 1990

CONTENTS

Preface vii

Workshop on first-order displacive phase transformations: review and recommendations 137
L. E. Tanner (Livermore, CA, U.S.A.) and M. Wuttig (College Park, MD, U.S.A.)

Electronic structure and phase stability: effect of a Bain transformation on the thermodynamic properties of substitutional alloys 145
P. E. A. Turchi (Livermore, CA, U.S.A.)

First-principles total energy calculations applied to displacive transformations 155
K. M. Ho and B. N. Harmon (Ames, IA, U.S.A.)

Some new aspects of first-order displacive phase transformations: martensites 167
J. A. Krumhansl (Ithaca, NY, U.S.A.) and Y. Yamada (Tokyo, Japan)

Anharmonicity and martensitic instabilities in β cubic structures 183
R. J. Gooding (Kingston, Ont., Canada)

Remarks on the nature of first-order displacive transformations 187
S. C. Moss (Houston, TX, U.S.A.)

The critical role of defects in first-order displacive transformations 189
P. C. Clapp (Storrs, CT, U.S.A.)

The influence of lattice softening of the parent phase on the martensitic transformation in Fe–Ni and Fe–Pt alloys 197
W. S. Owen (Cambridge, MA, U.S.A.)

Electron microscopy and neutron scattering studies of premartensitic behavior in ordered Ni–Al β_2 phase. 205
L. E. Tanner (Livermore, CA, U.S.A.), D. Schryvers (Antwerp, Belgium) and S. M. Shapiro (Upton, NY, U.S.A.)

Analyses of lattice and shape deformations and of atomic shuffles in martensitic transformation 215
J. W. Christian (Oxford, U.K.)

On the thermodynamics of martensite nucleation 229
A. L. Roitburd (Gaithersburg, MD, U.S.A.)

On the formation of martensite. 239
T. Suzuki (Tsukuba, Japan) and M. Wuttig (College Park, MD, U.S.A.)

A statistical thermodynamic theory of pre-martensitic tweed structure. 243
F. E. Fujita (Toyonaka, Japan)

Martensitic toughening of ceramics 249
W. M. Kriven (Urbana, IL, U.S.A.)

Martensitic phase transformations in alkali metals and cobalt alloys by neutron scattering techniques . . . 257
O. Blaschko (Vienna, Austria)

Ferroelastic phase transitions of alkali halide–alkali cyanide mixed crystals 265
K. Knorr (Mainz, F.R.G.)

AUTHOR INDEX 271
